SKILLS

HTML, CSS, SCSS, JavaScript, TypeScript, Vue.js (v2 & v3), Options API, Composition API, Vuex, Pinia, Nuxt.js (v2 & v3), React, Redux, Next.js, Vite, Tailwind CSS, Git, Axios, RESTful API, Apollo GraphQL, Vercel, JWT, OAuth, Agile, Scrum, Cross-functional teams, Component-driven development, CI/CD, SSR/SSO

EXPERIENCE

Front-End Developer, Takeads.ru

Jul 2024 – Nov 2025

Worked on high-traffic, production-grade web applications using Vue.js and React, with a strong focus on performance, scalability, and clean architecture.

- Developed and maintained SPA applications using Vue 3 / Nuxt 3 and React, focusing on performance, SEO, and user experience.
- Built scalable, reusable UI components using Vue (Composition API) and React (functional components & hooks).
- Implemented responsive interfaces with Tailwind CSS, SASS, and custom utilities.
- Integrated complex GraphQL and REST APIs, optimizing async flows, caching, and state management (Pinia / Vuex, React state patterns).
- Improved performance through bundle analysis, lazy loading, code splitting, and rendering optimizations across Vue and React applications.
- Set up CI/CD pipelines using GitHub Actions / GitLab CI, with deployments to Vercel and Docker environments.
- Conducted code reviews, mentored developers, and contributed to architectural and technical decisions.
- Collaborated closely with designers, backend engineers, and product managers to deliver high-quality features.

Front-End Developer, OrderSpark LLC

Aug 2023 – Jul 2024

Led frontend architecture and performance strategy for OrderSpark's e-commerce platform, building high-performance applications using Vue.js, Nuxt.js, Vite, and Tailwind CSS. Designed scalable UI systems and state management layers using Vuex. Championed best practices in accessibility, testing, and performance optimization while collaborating cross-functionally with design, backend, and product teams.

- Spearheaded frontend technical direction, resulting in a 40% improvement in load time and Core Web Vitals across key user flows.
- Participated early in the design phase with UI/UX teams, improving design-to-dev efficiency by 30%.

- Led integration of third-party services (Google Analytics, Stripe, OAuth, Firebase, and more), creating reliable and secure integrations that facilitate product scaling.
- Reduced crash rate by 20% through improved state handling in Vuex and proactive error logging.
- Mentored a junior developer, accelerating onboarding and contributing to higher code quality and delivery velocity.
- Advocated for and implemented lazy loading, component-level caching, and route-level code splitting for better performance at scale.
- Led the integration of Apollo GraphQL and RESTful APIs to streamline data fetching, reduce network requests, and improve state management, significantly enhancing application performance and maintainability.

Front-End Developer, Direlli LLC

Jul 2022 – Aug 2023

Worked on diverse client projects at Direlli, an outsourcing company, developing responsive and high-performance front-end applications using Vue.js, Nuxt.js, and Vite. Prioritized clean architecture, modular components, and maintainable codebases to ensure scalability. Collaborated closely with designers and back-end teams to deliver seamless UI/UX and robust functionality. Leveraged modern development practices with TypeScript, Pinia, and Tailwind CSS to create scalable solutions across multiple domains.

- Collaborated on high-impact client projects, delivering pixel-perfect UIs aligned with modern UX standards.
- Implemented component-based architecture using Vue 3 + TypeScript, increasing code reusability by 40%.
- Integrated Apollo GraphQL to streamline data fetching logic and reduce load times.
- Led front-end development for a key e-commerce platform, enhancing performance and user satisfaction.
- Delivered high-impact client projects with pixel-perfect UIs aligned to modern UX standards.
- Designed and implemented component-based architecture using Vue 3 and TypeScript, boosting code reusability by 40%.
- Integrated Apollo GraphQL to optimize data fetching and significantly reduce load times.
- Led front-end development for a flagship e-commerce platform, driving measurable improvements in performance and user satisfaction.

Front-End Developer, SharpAnt LLC

Feb 2021 – Jul 2022

SharpAnt, an outsourcing company, developed front-end solutions for diverse international clients using Vue.js and Nuxt.js. Focused on building scalable, maintainable applications while following best practices and collaborating across multi-disciplinary teams. Ensured smooth integration with RESTful and GraphQL APIs, contributing to robust product delivery pipelines.

- Mentored a team of 2 junior developers, which resulted in a 50% faster onboarding time and higher retention.
- Integrated RESTful APIs to enhance front-end functionality, resulting in a smoother user experience.

Front-End Developer, Medshopping.ru

Mar 2019 – Feb 2021

- Developed and supported the company's e-commerce project using React.js.
- Created responsive and clean interfaces that met modern UI/UX standards.
- Ensured consistent performance and usability throughout all stages of the project.

EDUCATION

Yerevan State University

B.Sc. in Informatics and Applied Mathematics

Relevant coursework: Data Structures & Algorithms, Web Development, OOP, Optimization & Operations
Research, Software Engineering & System Design

LANGUAGES

English – Full professional proficiency

Russian – Full professional proficiency

Armenian – Native or bilingual proficiency
